Organizations and Locations

www.csitech.com

Easy input with an organized display of data

Keep all intelligence data current; it's easy to update as new information comes in!

Customizable dashboards provide quick access to intelligence operations, reports and analytics

A Total Solution for the Management of your Agency's Intelligence Data!

Provides extensive ad-hoc searching by authorized staff

Generates custom and standard intelligence reports and fact sheets

Track gang violence with street gang member validation tools built into the system

Supports Global Search functionality

Totally integrated with other InfoShare™ prosecution modules, Police RMS and Major Incident Modules (MIM)

Complete document management functionality for all files and documents, including scanned and electronic records, mug shots, fingerprints and audio files. These records can be linked to an individual, a case or an intelligence operation

Facilitates data sharing with other agencies, while protecting data from access by unauthorized individuals

Link Analysis and advanced Crime Mapping features support Intelligence-Led Policing and help you:

- Spot crime trends
- Prioritize Investigations
- Effectively allocate resources to solve cases and mitigate crime
