*i*nfoshare™
Evidence Management System

Track Property and Evidence Within the Chain of Custody

Checks in Each Piece of Evidence, Tracks Chain of Custody, Scans, Barcodes and Labels!

Manage the Entire Evidence Process for Your Caseload!

Fully integrated with other InfoShare™ Modules

A Complete Evidence Management System!

Barcodes swiftly track and manage property and evidence:

01 Ensures data matches the physical evidence

02 Records the location as it is scanned

03 Provides inventory control for your agency, tracking all evidence collected, as well as unassigned equipment

04 Checked evidence can be checked out or destroyed, according to agency protocol

05 Provides ability to automatically print submission and chain-of-custody forms

06 Seamlessly integrates with other InfoShare™ modules to fully automate property and evidence tracking, from collection through disposition

Users can review the possession history (chain of custody) for any item

Evidence logs list ALL evidence related to a case

Captures ALL relevant case numbers associated with EACH piece of evidence!

Extensive search capabilities provided. Find the evidence you are looking for by a variety of criteria!

Ability to link a single piece of evidence to more than one case at a time
